

Why Do I receive a Prompt to Activate a 'Control' ?

Last Review: 1st May 2006

Symptoms

When loading certain courses (CU01-PRIV or CU01-ML for example), you are prompted to click on the screen in order to proceed into the course

Solution

You will receive this prompt once you move your mouse cursor over the area of the screen with the course in it. You will receive this prompt once at the beginning of each module, after you have clicked on the screen you may proceed.

More Information

You are receiving this prompt as a result of an update to the Internet Explorer browser. On April 11th, Microsoft released an Internet Explorer update which requires users to "activate" embedded objects and plug-ins on a website before they can interact with them.
