

CUDA CBT Help

Last Review: 6th October 2005

Symptoms

I am installing my CUDA CBT CD. How do I locate my computer name ? Where do I send it ?
How do I change my screen display settings ?

Solution

Locating your Computer Name

For Windows XP:

1. On your Desktop, right-click My Computer
2. Select Properties
3. Click the Computer Name tab
4. Your computer name is listed under Full Computer Name

For Windows 2000:

1. On your Desktop, right-click My Computer
2. Select Properties
3. Click the Network Identification tab
4. Your computer name is listed next to Full Computer Name

Windows 98:

1. Right-Click Network Neighborhood and Select Properties
2. Click the Identification tab
3. Your Computer Name is listed under Computer Name

Your computer name can be forwarded to training@cusource.ca, along with your name and CBT CD type (tutorial, simulator, tutorial and simulator).

Changing Screen Display Settings

1. Close all open windows until you are at your desktop
2. Right-click in an empty area on the Windows desktop
3. A menu will appear, select **Properties**. The Display Properties window should appear
4. Select the **Settings** tab
5. Make the adjustments you need.
6. When finished, click on **OK** to close the Display Properties window
