

Technical Requirements: CUSOURCE e-Learning

CUSOURCE e-Learning courses require a minimum configuration of hardware and software to ensure full functionality. The list below outlines the recommended specifications for each computer that will be operating any CUSOURCE e-Learning course.

HARDWARE REQUIREMENTS (Minimum)

Pentium III or equivalent

128MB RAM

Sound Enabled

Note: Many courses have sound clips that are essential to the course material. Performance will vary with computers equipped with higher and/or lower specifications.

SOFTWARE REQUIREMENTS

Microsoft Internet Explorer 5.5 to 6.0

Sun Java 2 v1.4.2 or higher

Adobe Acrobat Reader

Macromedia Flash Player

Note: Please contact your IT department to ensure that the above software does not conflict with any existing configuration or installation.

Additional Software Configuration

Microsoft Virtual Machine – Disable JIT compiler

Browser security settings – Enable cookies

Note: Microsoft Virtual Machine may or may not exist on the computer.
